

**EARTH BUILDER
SUMMIT 2027**
4th+5th MARCH · STUTTGART

CALL FOR ABSTRACTS!

Dear Earth Builders,

Stuttgart Technical University of Applied Sciences and Biberach University of Applied Sciences cordially invite you to the Earth Builder Summit 2027, taking place March 4th–5th, 2027, in Stuttgart.

The conference provides a platform for scientific exchange on engineering innovations in earthen construction. The focus will be on the latest research results and technological developments for the sustainable use of earth as a building material. An open evening event will provide opportunities for networking and professional exchange.

Topics of interest include:

- Structural Design and Engineering:
Masonry | Earthquake Engineering | Fastenings / Connections
- Materials and Manufacturing:
Cast Earth | Highly compacted Earth | Additives | 3D-Printing
- Building Physics:
Fire protection | Noise insulation | Hygrothermal behaviour

You are warmly invited to submit the latest findings from your research in the form of a presentation or a poster. All accepted submissions will be published in the conference proceedings.

We particularly welcome contributions from ongoing research projects, including work that is still incomplete or raises open research questions.

Abstract submission deadline: 31.07.2026

Final paper submission deadline: 15.11.2026

We look forward to receiving your contributions!
